# ACTIVITY 01- PYTHON INTRODUCTION

Create a simple program that prints a profile by using variables and formatting strings.

https://github.com/SasetMartinez/SasetMartinez/commit/2e8c506467a4acd567b845791ebbbdedbeb088fa

# ACTIVITY 02- SIMPLE AI

Create a simple program that ask for user data and changes the output based on the data.

https://github.com/SasetMartinez/SasetMartinez/commit/8e7f02fb7418ee705f7303f8aafaec0e37a6f683

# ACTIVITY 03- CVS INTRODUCTION

It is only the link to the folder on GitHub.

https://github.com/SasetMartinez/SasetMartinez.git

# ACTIVITY 04- TARGET CREATION FOR AUGMENTED REALITY

Design a simple AR application mock-up. The marker will be evaluated by Vuforia´s standards.

"I chose this picture because I like dragons. I tried making some features in the green zone"
